Beautifully molded in one piece, Homecrest Fiber Foam furniture provides new decorating excitement.

The bright lustrous finish of this beautiful furniture is provided by the polyester gel coat backed by strength-giving layers of fiberglass impregnated with polyester resin. A steel frame is then secured around the inside perimeter and the interior is then sprayed with a 3/8" layer of rigid polyurethane foam. Bases are made of square tubular steel and finished in white baked-on acrylic enamel.

Resilient Nimbus foam seat cushions are wrapped with polyester fiber bond and upholstered in fine fabrics or expanded vinyls. Polyfoam back cushions also have zippered removable upholstery covers.

122 Love Seat. Overall width 56", height 27". Seat width 48", depth 22", height 17". Shipped with base removed at 97 lbs.

G1930 Corner Table, G1630 Cocktail Table and G2025 Lamp Table are described in detail on page 7.

Long, low, and beautiful

This distinctively styled sofa has end table arms which provide extra utility and convenience.

Whether you want a fashion-setting group for a modern living area, an accent piece or two in home or apartment, or a practical arrangement for a busy office this new furniture adapts easily and wears well.

Homecrest Fiber Foam is easy to care for and will retain its beauty for years. Care for it as you would fine wood furniture. Careless handling should be avoided as it can cause scratches or may chip the smooth surface.

123T Sofa. Overall length 99", height 27". Seat width 72", depth 23", height 17". Shipping weight 142 lbs.

G1917 Bunch Tables, 19" x 19" x 17" high, have Temper-Tuf safety glass tops. See page 7 for matching tables and etageres.

Fashionable new tables and etageres

a decorators delight, they make any room an interesting show-case for your accessories with their sparkling glass tops supported by slender square steel tubes.

Temper-Tuf safety glass, used for all Homecrest glass table tops, is four times stronger than regular glass. It can be broken only by a heavy blow or by bending beyond its maximum flex; and, if broken, it crumbles into thousands of harmless pebble-like particles. The glass withstands heat up to 400°F and is so durable it is used for automotive windows, refrigerator shelves, and oven doors.

Table frames are finished in white or black baked-on acrylic enamel and are shipped KD flat (with vertical tubes removed) for quick easy assembly by the retail customer.
